

E26.1

E26.1

Reference: Hesse, 1994; Fitzsimmons et al., 2013

Depth: Depth intervals given in paper

Age: Age is top, approximating to center. Assuming sample thickness is 2 cm.

AMS 14C on planktonic foraminifera *G. menardii*, calibrated with IntCal09.

Age error: From calibrated 14C ages

SBMAR: based on 3rd order regression model

SBMAR err: Assume from age error, 5% from terrigenous fraction. Assume DBD uncertainty 5%.

EC: ash-corrected terrigenous fraction - operational definition

EC err: Assume 5%

Size: Coulter Counter
